Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9 and 15-18, drawn to an apparatus for electrically connecting first and second conductors through an electrical insulating wall, classified in class 439, subclass 797.
 - II. Claims 10-14, drawn to a method of electrically connecting first and second conductors through an electrical insulating wall, classified in class 29.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as apparatus and product made.

The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2839
